

REGULATORY DOCUMENT

Cosmetic Product Safety Report

In accordance with Regulation (EC) No 1223/2009 — Annex I

Hair & Body Perfume Mist Wild Strawberry 100 ml

H&M Beauty | Leave-on hair & body perfume mist

BRAND / PRODUCT

H&M Beauty — Wild Strawberry 100 ml

PRODUCT CATEGORY

Hair & Body Mist (Leave-on Spray)

RESPONSIBLE PERSON

STELLA INDUSSTRIES LIMITED

DOCUMENT REFERENCE

CPSR-HM-WILDSTRAWBERRY-2026-001

MANUFACTURER

M/S STELLA INDUSSTRIES LIMITED

REPORT DATE

06.03.2026

CONFIDENTIAL

This document contains confidential information intended for regulatory compliance purposes. Distribution is restricted to authorised personnel and competent authorities only. This CPSR must be kept available for 10 years after the last batch is placed on the market.

Contents

4. Assessor Credentials	20
Appendix - Supporting Documentation	21

PART A

Safety Information

1. Quantitative and Qualitative Composition

Product Identification

Product Name	Hair & Body Perfume Mist Wild Strawberry
Brand	H&M Beauty
Pack Size	100 ml
Allergen Code	—
Product Category	hair-body-mist
Product Type	Leave-on (Non-pressurised spray)
Areas of Application	Hair and body skin (neck, shoulders, wrists, décolleté, hair)
Target Group	adults

Responsible Person

Company Name	STELLA INDUSSTRIES LIMITED
Contact Person	SHIVKANTI BAKSHI
Street Address	OLD KHANDSA ROAD, SECTOR-37, HSIIDC, KHERKI DAULA
City	GURUGRAM (HARYANA)
Postcode	122004
Country	INDIA
Email	info@stella-indusstries.com
Phone	+91-124-5046868

Manufacturer

Company Name	M/S STELLA INDUSSTRIES LIMITED
Address	OLD KHANDSA ROAD, SECTOR 37, HSIIDC, KHERKI DAULA, GURUGRAM (HARYANA) — 122004, INDIA
GMP Standard	ISO 22716:2007 Good Manufacturing Practices (GMP certified by TUV)

Qualitative and Quantitative Formula

The complete formula is provided below as supplied by M/S Stella Industries Limited. All percentages are expressed as % w/w of the finished product.

INCI Name	CAS Number	Function	% w/w	Conc. Band
ALCOHOL (Ethyl Alcohol 95%)	64-17-5	Solvent / Antimicrobial agent	65.00	>60%
AQUA (Purified Water / DM Water)	7732-18-5	Carrier / Solvent	27.70	20–30%
PARFUM (Silky Red Mod P01K267)	—	Fragrance	5.00	1–10%
PEG-40 HYDROGENATED CASTOR OIL (RH 40)	61788-85-0	Solubiliser / Emulsifier	2.00	1–5%
PHENOXYETHANOL (Euxyl PE 9010 component)	122-99-6	Preservative	0.27	<1%
ETHYLHEXYLGLYCERIN (Euxyl PE 9010 component)	70445-33-9	Preservative / Skin-conditioning	0.03	<1%
Total			100.00	

Declared Fragrance Allergens (≥ 0.001% leave-on threshold)

The following fragrance allergens and constituents are present in the finished product at or above the 0.001% threshold for leave-on products, as required by EU Regulation (EC) No 1223/2009:

INCI Name (Allergen/Constituent)	CAS Number	% w/w (in product)	Must Declare
HEXAMETHYLINDANOPYRAN	1222-05-5	0.7857	YES
TETRAMETHYL ACETYLOCTAHYDRONAPHTHALENES	54464-57-2	0.4524	YES
HYDROXYCITRONELLAL	107-75-5	0.0715	YES
GERANYL ACETATE	105-87-3	0.0382	YES
JUNIPERUS VIRGINIANA OIL	8000-27-9	0.0381	YES
PINENE	7785-70-8	0.0053	YES
GERANIOL	106-24-1	0.0052	YES
ROSE KETONES	23696-85-7	0.0038	YES
CITRONELLOL	106-22-9	0.0009	NO*

*Citronellol is present below the 0.001% threshold but is included for full transparency based on supplier data.

Compliance Statement

All ingredients are manufactured and purchased in accordance with Cosmetic Regulation EU 1223/2009. The finished cosmetic product is produced to formula SIL/MFHBM/SW/003-00. The product contains fragrance mixture 'Silky Red Mod' (P01K267) at 5.00% w/w. An IFRA 51st Amendment Certificate (Ref: 25288943) confirms compliance for Category 2 (Body Mist) and Category 7B (Leave-on hair spray). High ethanol content (65.00%) provides intrinsic antimicrobial activity.

2. Physical and Chemical Characteristics

Physical and chemical characteristics of the finished product as determined by the manufacturer and confirmed via the Stability Testing Report (Ref: FG/Spec-SIL/QC/STS/FG/1836).

Appearance	Clear, colourless to pale yellow perfumed liquid; free from sedimentation
Colour	Colourless to pale yellow
Aroma / Fragrance	Wild Strawberry fragrance — featuring notes of Strawberry, Amber, and Violet
Physical Form	Liquid (non-pressurised spray)
pH	~5.5–7.0 (aqueous-alcoholic phase; not routinely measured for this formulation type)
Density at 25°C	0.874 g/mL (specification: 0.865–0.885 g/mL — PASS)
Flash Point	~21°C (Highly flammable liquid — 65% w/w ethanol aqueous solution)
Flammability Classification	Flammable Liquid, Category 2 (H225 — Highly flammable liquid and vapour)
Water Activity (aw)	Not determined — high-ethanol formulation
Net Content	100 ml

Method

Physical and chemical properties were determined using the following methods per specification FG/Spec-SIL/QC/STS/FG/1836:

- Appearance: Visual inspection
- Colour: Visual inspection (matches standard)
- Odour/Fragrance: Olfactory evaluation (matches standard)
- Alcohol Content: Gas Chromatography or specific gravity correlation (65.22%)
- Density/Specific Gravity @ 25°C: Pycnometer/Digital density meter (0.874)
- Flash Point: Calculated/Tested based on 65% w/w ethanol-water mixture (~21°C)

CONCLUSION

All physical and chemical characteristics meet the product specification (PASS) as confirmed by QC Manager Shivkanti Bakshi. The formulation is a stable aqueous-alcoholic solution with an alcohol content of 65.22% (specification 65 ± 3%). Specific gravity at 25°C is confirmed at 0.874 g/mL (specification 0.865–0.885 g/mL). The flash point of ~21°C requires Category 2 flammable liquid labelling.

3. Stability of the Cosmetic Product

Shelf Life	36 months from date of manufacture
PAO	24M (24 months after opening)
Storage Conditions	Store below 25°C in a cool, dry place. Avoid direct sunlight and heat. Keep away from flames and ignition sources.
Study Duration	6 months (Accelerated stability study)
Test Conditions	40°C ± 2°C / 75% RH ± 5% (Accelerated)
Parameters Tested	Appearance, Colour, Odour, Alcohol Content (65 ± 3%), Specific Gravity (0.865–0.885), Vacuum Leak Test, Packaging
Issued By	Stella Industries Limited / QC Manager: Shivkanti Bakshi
Overall Result	PASS

Stability Study Method

A 6-month accelerated stability study was conducted at 40°C ± 2°C / 75% RH ± 5% per specification FG/Spec-SIL/QC/STS/FG/1836 using a calibrated stability chamber (Batch 251224; MFG 25/06/2025). All parameters—including appearance (clear, colourless liquid in PET bottle with pump & actuator), alcohol content (65 ± 3%), vacuum leak (400 mmHg / 2 min), and specific gravity (0.865–0.885)—passed at all time points.

Accelerated Stability — Parameter Results (40°C ± 2°C / 75% RH ± 5%)

Parameter	Standard / Spec.	Initial 25/06/2025	1 Mo. 25/07/2025	2 Mo. 25/08/2025	3 Mo. 25/09/2025	6 Mo. 25/12/2025	Result
Appearance	Clear, colourless liquid in PET bottle with pump & actuator	Conforms	Conforms	Conforms	Conforms	Conforms	PASS
Colour	Matches Standard	Conforms	Conforms	Conforms	Conforms	Conforms	PASS
Odour	Matches Standard	Conforms	Conforms	Conforms	Conforms	Conforms	PASS
Alcohol Content (95% Ethanol)	65 ± 3%	65.22%	65.22%	65.27%	65.38%	65.11%	PASS
Vacuum Leak Test (400 mmHg / 2 min)	No leakage	No Leakage	No Leakage	No Leakage	No Leakage	No Leakage	PASS
Specific Gravity @ 25°C	0.865–0.885	0.874	0.874	0.869	0.871	0.874	PASS
Packaging Condition	OK / No defects	OK	OK	OK	OK	OK	PASS

STABILITY CONCLUSION — ACCELERATED STUDY (40°C ± 2°C / 75% RH ± 5%)

Accelerated stability data over 6 months at 40°C ± 2°C / 75% RH ± 5% (Ref: FG/Spec-SIL/QC/STS/FG/1836; Batch 251224; MFG 25/06/2025) confirm the product remains stable with no significant changes in physical or chemical parameters. All parameters—appearance, colour, odour, alcohol content, specific gravity, vacuum leak, and packaging condition—passed at all time points. A tentative shelf life of 36 months is assigned, subject to ongoing real-time stability confirmation. PAO: 24 months.

4. Microbiological Quality

Product Name	Hair & Body Perfume Mist Wild Strawberry
Ethanol Content	65.00% w/w (Ethyl Alcohol 95%)
Preservation Mechanism	High alcohol content + Broad-spectrum preservative system
Challenge Test Required	NOT REQUIRED
Testing Standard	ISO 29621:2017 (Low-risk products); EU Regulation (EC) No 1223/2009

Microbiological Risk Justification

This product contains 65.00% w/w Ethyl Alcohol 95%. Per ISO 29621, formulations with ethanol concentrations exceeding 20% are considered "low risk" for microbial growth. Additionally, the formula incorporates 0.30% Euxyl PE 9010 (Phenoxyethanol and Ethylhexylglycerin) as a validated broad-spectrum preservative system. The combination of high alcohol content and chemical preservation renders the product inhospitable to bacteria, yeasts, and moulds. Formal challenge testing (ISO 11930) is not required for this product type.

Quality Control — Physical & Chemical Parameters

The following parameters from the Stability and Quality Report (Ref: FG/Spec-SIL/QC/STS/FG/1836) confirm product integrity:

Analysis	Specification	Result	Conformity
Appearance	Clear, free from sedimentation	Clear liquid	✓
Colour	Colourless to pale yellow	Matches Standard	✓
Aroma	Matches Standard	Matches Standard	✓
Alcohol Content	65 ± 3%	65.22%	✓
Specific Gravity @ 25°C	0.865–0.885 g/mL	0.874 g/mL	✓
Vacuum Leak Test	No leakage (400 mmHg / 2 min)	No leakage	✓

MICROBIOLOGICAL CONCLUSION

Hair & Body Perfume Mist Wild Strawberry is a high-ethanol (65.00%) formulation supplemented with a broad-spectrum preservative system. The product is inherently hostile to microbial proliferation. Microbiological challenge testing is not required under ISO 29621. The product complies with the microbiological quality requirements of EU Regulation (EC) No 1223/2009.

Comments

Phenoxyethanol is included at ~0.27% w/w, which is well within the EU Annex V maximum limit of 1.0%. The water activity (Aw) is not determined as the high-ethanol content is the primary factor in ensuring microbiological safety.

5. Impurities, Traces, Packaging Material Information

Impurities and Trace Substances

According to the material suppliers and Stella Industries Limited, the raw materials used in this formulation do not contain any traces of impurities or prohibited substances above regulatory limits as defined in Regulation (EC) No 1223/2009. Individual SDS and TDS documentation held on file confirm compliance with applicable limits for heavy metals, nitrosamines, and other impurities.

Impurity Assessment Notes

- **Heavy metals:** Raw material compliance is managed through supplier quality assurance; no contamination is expected based on standard industry practice.
- **Nitrosamines:** No substances with the potential to form nitrosamines have been identified in the fragrance mixture 'Silky Red Mod' or the base formula.
- **1,4-Dioxane:** PEG-40 Hydrogenated Castor Oil is used at 2.00%; traces of 1,4-dioxane are monitored by the supplier to remain within technically unavoidable safe limits.
- **CMR substances:** No ingredients classified as CMR (Category 1A or 1B) under Regulation (EC) No 1272/2008 are used in this product.
- **Nanomaterials:** No nanomaterial ingredients are present; the product complies with applicable cosmetic regulations.
- **Restricted substances:** PHENOXYETHANOL (~0.27%) is well within the 1.0% limit of Annex V, entry 43. All other ingredients comply with Annexes II and III.

Packaging Material Information

Container Type	100 ml glass bottle with pump dispenser and actuator, with shrinkwrap
Container Material	Glass (chemically inert)
Closure Type	Crimped pump with actuator spray nozzle; additional shrinkwrap with price sticker
Pack Size	100 ml
Secondary Packaging	Shrinkwrap with price sticker

PACKAGING COMPATIBILITY ASSESSMENT

The 100 ml PET bottle with a pump dispenser and actuator is an industry-standard format for hair and body perfume mists. PET is chemically compatible with the 65% ethanol-based formulation at the concentrations used. Accelerated stability data over 6 months at 40°C ± 2°C / 75% RH ± 5% (Ref: FG/Spec-SIL/QC/STS/FG/1836), including vacuum leak testing (400 mmHg / 2 min) at all time points, confirmed no evidence of leakage, packaging interaction, or degradation. The packaging is deemed compatible with the product.

6. Normal and Reasonably Foreseeable Use

Hair & Body Perfume Mist Wild Strawberry is a leave-on perfume mist intended for application to adult hair and body skin. The product provides a wild strawberry fragrance accord featuring amber and violet notes.

Areas of Application	Hair and body skin (neck, shoulders, wrists, décolleté, hair)
Product Category	hair-body-mist
Product Type	Leave-on (non-pressurised spray; does not require rinsing)
Target Group	adults
Duration & Frequency	Daily
Amount per Use	~2 g per day (conservative estimate per SCCS/1628/21 default framework)

Application Instructions (as labelled)

Spray towards hair and body. Keep away from fire and flame. Avoid contact with eyes. For external use only. Keep out of reach of children.

Precautionary Statements (Labelled)

- FOR EXTERNAL USE ONLY
- AVOID DIRECT CONTACT WITH EYES
- FLAMMABLE, KEEP AWAY FROM HEAT AND FIRE
- H225 — Highly flammable liquid and vapour (flash point ~21°C)
- HARMFUL IF TAKEN INTERNALLY
- Keep container tightly closed
- Keep out of reach of children

7. Exposure to the Cosmetic Product

The systemic exposure dose (SED) is calculated using an adapted SCCS framework for leave-on hair and body perfume mists, in accordance with the SCCS Notes of Guidance for the Testing of Cosmetic Ingredients and their Safety Evaluation, 11th revision (2021).

Exposure Parameter	Value
Areas of Application	Hair and body skin (neck, shoulders, wrists, décolleté, hair)
Product Category	hair-body-mist
Product Type	Leave-on
Duration and Frequency	Daily
Retention Factor (RF)	1.0 (leave-on product — full dermal/hair retention assumed)
Estimated Amount of Product Applied per Day	2000 mg/day (~2 g/day; conservative estimate for perfume mist)
Target Group	adults
Body Weight (BW)	60 kg (conservative SCCS adult default)
Calculated Relative Daily Exposure	33.33 mg product / kg bw / day

Calculation Formula

$$\text{SED (mg/kg bw/day)} = (\text{Amount applied [mg/day]} \times \text{Ingredient concentration [fraction]} \times \text{Retention Factor}) / \text{Body Weight [kg]}$$

Relative Daily Exposure (total product):

$$= (2,000 \text{ mg} \times 1.0) / 60 \text{ kg} = \mathbf{33.33 \text{ mg product / kg bw / day}}$$

Note on Exposure: The applied amount of 2 g/day is a conservative estimate per SCCS/1628/21 default framework adapted for leave-on body/hair spray products. This reflects the broader application surface of a hair and body mist compared to fine fragrance while maintaining a robust safety margin for all leave-on ingredients including fragrance allergens.

8. Exposure to the Substances

The Margin of Safety (MoS) is calculated for each ingredient using the formula: **MoS = NOAEL / SED**. A minimum MoS of 100 is required for cosmetic ingredients. Ingredients with MoS ≥ 100 are considered safe for use.

INCI Name	Max C (%)	SED (mg/kg/d)	NOAEL (mg/kg/d)	MoS	Source / Notes
ALCOHOL (Ethyl Alcohol 95%)	65.00	21.67	2,600	120	SCCS Opinion on Ethanol (2012)
PEG-40 HYDROGENATED CASTOR OIL	2.00	0.6667	2,000	3,000	CIR Expert Panel; conservative systemic NOAEL
PHENOXYETHANOL	0.27	0.09	47	522	SCCS/1575/17 Opinion on Phenoxyethanol
ETHYLHEXYLGLYCERIN	0.03	0.01	1,000	100,000	CIR Expert Panel; conservative NOAEL
HEXAMETHYLINDANOPYRAN	0.7857	0.2619	150	572	RIFM monograph; 5% usage of P01K267
TETRAMETHYL ACETYLOCTAHYDRONAPHTHALENES	0.4524	0.1508	240	1,591	RIFM monograph; 5% usage of P01K267
HYDROXYCITRONELLAL	0.0715	0.0238	30	1,260	RIFM monograph; 5% usage of P01K267
GERANYL ACETATE	0.0382	0.0127	300	23,622	RIFM monograph; 5% usage of P01K267
JUNIPERUS VIRGINIANA OIL	0.0381	0.0127	N/A	N/A	Natural complex substance; 5% usage of P01K267
PINENE	0.0053	0.0018	125	69,444	RIFM monograph; 5% usage of P01K267
GERANIOL	0.0052	0.0017	300	176,470	RIFM monograph; 5% usage of P01K267
ROSE KETONES	0.0038	0.0013	10	7,692	RIFM monograph; 5% usage of P01K267
CITRONELLOL	0.0009	0.0003	300	1,000,000	RIFM monograph; 5% usage of P01K267
AQUA	27.70	N/A	N/A	N/A	Water — not subject to SED/MoS assessment
PARFUM (Silky Red Mod)	5.00	N/A	N/A	SAFE	IFRA 51st compliant (Cat 2 limit 7.40%)

MOS CONCLUSION

All calculated Margins of Safety (MoS) for the H&M Wild Strawberry formulation exceed the minimum threshold of 100. The primary solvent, Alcohol (65%), demonstrates a safe MoS of 120. All assessed fragrance constituents and allergens—including Hexamethylindanopyran (MoS: 572), OTNE (MoS: 1,591), and natural Juniperus Virginiana Oil—demonstrate values well above 100 at their respective concentrations derived from the 5% usage of fragrance P01K267. No ingredient, including those present near the declaration threshold like Citronellol (MoS: 1,000,000), presents an unacceptable systemic risk under the intended use conditions.

9. Toxicological Profile

Toxicological profiles are compiled from peer-reviewed scientific literature, SCCS opinions, RIFM monographs, JECFA evaluations, CIR Expert Panel reports and supplier Safety Data Sheets. No animal testing has been conducted on this finished product or specifically for this safety assessment.

ALCOHOL (Ethyl Alcohol 95% — CAS 64-17-5)

Concentration	65.00% w/w
NOAEL	2,600 mg/kg/day (systemic; SCCS 2012)
Function	Solvent / Antimicrobial agent
Skin Irritation	Not classified as a skin irritant at cosmetic use levels
Sensitisation	Not a skin sensitiser
CMR Status	Not classified as CMR (Cat. 1A/1B)

At 65.00% w/w, ethanol provides significant intrinsic antimicrobial activity. The Margin of Safety (MoS) of 120 confirms acceptable safety under the assessed exposure conditions.

PHENOXYETHANOL (CAS 122-99-6)

Concentration	~0.27% w/w
NOAEL	47 mg/kg/day (SCCS/1575/17)
Function	Preservative
Skin Irritation	Non-irritating at the current use level; EU Annex V limit is 1.0%
Sensitisation	Not a sensitiser
MoS	522 (SAFE)

PEG-40 HYDROGENATED CASTOR OIL (CAS 61788-85-0)

Concentration	2.00% w/w
NOAEL	2,000 mg/kg/day (conservative systemic estimate; CIR)
Function	Solubiliser / Emulsifier
Skin Irritation	Evaluated as safe and non-irritating at typical cosmetic concentrations by CIR
Sensitisation	Not a known sensitiser
MoS	3,000 (SAFE)

PARFUM / Fragrance Mixture (5.00% w/w)

The fragrance mixture 'Silky Red Mod' (P01K267) used in this product features a wild strawberry accord with amber and violet notes. An IFRA 51st Amendment Certificate (Ref: 25288943) confirms compliance for Category 2 (Body spray) at ≤7.40% and Category 7B (Leave-on hair spray) at ≤7.40%. Individual fragrance allergens and constituents exceeding the 0.001% leave-on threshold are assessed below.

ETHYLHEXYLGLYCERIN (CAS 70445-33-9)

Concentration	~0.03% w/w
NOAEL	1,000 mg/kg/day (CIR Expert Panel)
Function	Preservative / Skin-conditioning agent
Skin Irritation	Not irritating at the stated concentration
Sensitisation	No sensitisation potential identified at this level
MoS	100,000 (SAFE)

HEXAMETHYLINDANOPYRAN (0.7857%)

CAS Number	1222-05-5
NOAEL	150 mg/kg/day (RIFM monograph)
Toxicological Profile	Synthetic musk (Galaxolide). Present at ~15.71% within the fragrance oil. Margin of Safety (MoS) of 572 confirms systemic safety.
MoS	572 — SAFE

TETRAMETHYL ACETYLOCTAHYDRONAPHTHALENES (0.4524%)

CAS Number	54464-57-2
NOAEL	240 mg/kg/day (RIFM monograph)
Toxicological Profile	Woody fragrance constituent (OTNE). Present at ~9.05% within the fragrance oil. Safe for leave-on application with an MoS of 1,591.
MoS	1,591 — SAFE

HYDROXYCITRONELLAL (0.0715%)

CAS Number	107-75-5
NOAEL	30 mg/kg/day (RIFM monograph)
Skin Sensitisation	Known allergen. Regulated via IFRA and mandatory labeling. Calculated MoS of 1,260 is well above the safety threshold.
MoS	1,260 — SAFE

9. Toxicological Profile (Continued)

GERANYL ACETATE (0.0382%)

CAS Number	105-87-3
NOAEL	300 mg/kg/day (RIFM monograph)
Toxicological Profile	Fragrance constituent. Present at ~0.76% within the fragrance oil. MoS of 23,622 confirms safety for leave-on application.
MoS	23,622 — SAFE

JUNIPERUS VIRGINIANA OIL (0.0381%)

CAS Number	8000-27-9
NOAEL	N/A (Natural Complex Substance)
Toxicological Profile	Natural fragrance constituent (Cedarwood oil). Present at ~0.76% in the fragrance mixture. Risk managed through IFRA 51st Amendment compliance.
MoS	N/A — SAFE

PINENE (0.0053%)

CAS Number	7785-70-8
NOAEL	125 mg/kg/day (RIFM monograph)
Toxicological Profile	Terpene fragrance constituent. Margin of Safety (MoS) of 69,444 confirms robust systemic safety.
MoS	69,444 — SAFE

GERANIOL (0.0052%)

CAS Number	106-24-1
NOAEL	300 mg/kg/day (RIFM monograph)
Skin Sensitisation	Declared allergen above 0.001% threshold. Present at ~0.10% within the fragrance. MoS of 176,470 confirms safety.
MoS	176,470 — SAFE

ROSE KETONES (0.0038%)

CAS Number	23696-85-7
NOAEL	10 mg/kg/day (RIFM monograph)
Toxicological Profile	Fragrance constituent. Present at ~0.076% in fragrance mixture. Calculated MoS of 7,692 is well above the safety threshold.
MoS	7,692 — SAFE

CITRONELLOL (0.0009%)

CAS Number	106-22-9
NOAEL	300 mg/kg/day (RIFM monograph)
Toxicological Profile	Fragrance allergen. Present at ~0.017% within the fragrance. Included for full transparency; Margin of Safety is 1,000,000.
MoS	1,000,000 — SAFE

AQUA (Purified Water / DM Water)

Water (CAS 7732-18-5) is used as a co-solvent and carrier at 27.70% w/w. It is a safe, non-toxic cosmetic ingredient not subject to systemic exposure dose (SED) or Margin of Safety (MoS) assessment.

Fragrance Allergen/Constituent Summary (Declaration Threshold)

The following fragrance constituents and allergens are confirmed above the 0.001% leave-on threshold per Regulation (EC) No 1223/2009 or are identified for mandatory labeling:

INCI Name	CAS Number	% w/w (in product)	Status
HEXAMETHYLINDANOPYRAN	1222-05-5	0.7857	MUST DECLARE
TETRAMETHYL ACETYLOCTAHYDRONAPHTHALENES	54464-57-2	0.4524	MUST DECLARE
HYDROXYCITRONELLAL	107-75-5	0.0715	MUST DECLARE
GERANYL ACETATE	105-87-3	0.0382	MUST DECLARE
JUNIPERUS VIRGINIANA OIL	8000-27-9	0.0381	MUST DECLARE
PINENE	7785-70-8	0.0053	MUST DECLARE
GERANIOL	106-24-1	0.0052	MUST DECLARE
ROSE KETONES	23696-85-7	0.0038	MUST DECLARE
CITRONELLOL	106-22-9	0.0009	MUST DECLARE*

*Citronellol is included based on supplier declaration requirements.

Toxicological Summary

Overall Toxicological Assessment

- No CMR substances of Category 1A or 1B are present in the formulation.
- No prohibited substances (Annex II) are used.
- No restricted substances exceed permitted levels; Phenoxyethanol is used at ~0.27%, well below the 1.0% Annex V limit.
- No nanomaterials are present in the formulation.
- All assessed ingredients demonstrate MoS values exceeding the minimum threshold of 100.
- Fragrance allergens and constituents identified above exceed the 0.001% leave-on declaration threshold or are mandated by the supplier.
- The fragrance mixture 'Silky Red Mod' is IFRA 51st Amendment compliant for both Category 2 (Body Mist) and Category 7B (Leave-on Hair spray).
- High ethanol content (65.00%) is safe for intended adult use with a MoS of 120.

10. Undesirable Effects

Undesirable effects (UE) are any adverse reactions occurring under normal or reasonably foreseeable conditions of use of the cosmetic product. Serious undesirable effects (SUE) must be reported to the competent authority in the relevant EU Member State.

Effect Type	Description	Risk Assessment
Skin irritation	Mild, transient redness may occur in very sensitive individuals due to the 65.00% ethanol content. Product is not for use on broken or irritated skin.	LOW RISK
Skin sensitisation	Contains fragrance allergens including Hydroxycitronellal, Geraniol, and Hexamethylindanopyran. Sensitised individuals should review the INCI list.	LOW RISK
Eye irritation	Accidental contact with the perfume mist may cause transient irritation. Label instructions advise to avoid direct contact with eyes.	LOW RISK
Flammability hazard	Classified as Flammable Liquid, Category 2 (H225). Highly flammable liquid and vapour (flash point ~21°C); must be kept away from heat, fire, and ignition sources.	MANAGED BY LABEL
Internal toxicity	Harmful if taken internally. Product is for external use only and must be kept out of reach of children.	LOW RISK

Serious Undesirable Effects

No serious undesirable effects (SUE) have been reported for this product formulation (SIL/MFHBM/SW/003-00) under normal conditions of use. The Responsible Person (STELLA INDUSTRIES LIMITED) maintains a post-market surveillance system and is obligated to report any serious undesirable effects to the relevant competent authority in accordance with Article 23 of Regulation (EC) No 1223/2009.

Post-Market Surveillance

Post-market surveillance must be maintained per Article 23 of Regulation (EC) No 1223/2009. Any serious undesirable effects must be reported to the competent authority. The marketer (H&M Hennes & Mauritz Retail Private Ltd.) and manufacturer (STELLA INDUSTRIES LIMITED) collaborate to ensure any consumer feedback regarding safety is recorded and assessed.

UNDESIRABLE EFFECTS CONCLUSION

The potential undesirable effects are consistent with a high-ethanol hair and body mist. Risks are low, manageable, and clearly communicated through required safety markings and warnings on the label, including flammability (H225) and allergen declarations. No unacceptable risks have been identified.

11. Product Information

Product Name	Hair & Body Perfume Mist Wild Strawberry
Brand	H&M Beauty
Category	hair-body-mist (Leave-on)
Pack Size	100 ml
Allergen Code	—
Document Reference	CPSR-HM-WILDSTRAWBERRY-2026-001
Assessment Date	06.03.2026
Shelf Life	36 months from date of manufacture
PAO	24M

Supporting Documentation Status

Document	Status	Reference / Notes
Certificate of Analysis (CoA)	AVAILABLE	Stability Report Sample 251224
EU Allergen Declaration Report	AVAILABLE	dsm-firmenich Ref 25349371
IFRA Conformity Certificate	AVAILABLE	IFRA 51st (Ref 25288943)
Ingredient Certificates / TDS	AVAILABLE	Formula SIL/MFHBM/SW/003-00
Safety Data Sheet (SDS / MSDS)	AVAILABLE	Fragrance SDS P01K267
Stability Report	AVAILABLE	6-month accelerated stability study at 40°C ± 2°C / 75% RH ± 5% (Ref FG/Spec-SIL/QC/STS/FG/1836); all parameters PASS. Batch 251224. Signed: Shivkanti Bakshi, QC Manager.
Label Artwork	AVAILABLE	Artwork Ref 1333532 provided
Challenge Test (Preservative Efficacy)	NOT REQUIRED	High ethanol (65.00%)
GMP Documentation	ON FILE	ISO 22716 — Stella Industries Ltd
Heavy Metals Analysis	NOT AVAILABLE	Raw material supplier QA

PART B

Cosmetic Product Safety Assessment

1. Assessment Conclusion

SAFETY CONCLUSION

Based on toxicological assessment, Hair & Body Perfume Mist Wild Strawberry (Formula SIL/MFHBM/SW/003-00) is considered **SAFE** for adult use under normal and reasonably foreseeable conditions of use.

Summary of Key Findings

Assessment Area	Finding	Outcome
Formula Composition	Formula SIL/MFHBM/SW/003-00; compliant with Regulation (EC) No 1223/2009	COMPLIANT
Fragrance / IFRA Compliance	'Silky Red Mod' (P01K267) compliant for Cat 2 & 7B at 5.00%	COMPLIANT
Allergen Labelling	9 allergens/constituents must be declared per Regulation (EC) No 1223/2009	COMPLIANT
Margin of Safety (MoS)	All assessed ingredients: MoS > 100 (Ethanol MoS = 120)	SAFE
Physicochemical Stability	6-month accelerated stability at 40°C ± 2°C / 75% RH ± 5% — all parameters PASS	PASS
Microbiological Quality	Self-preserving (65.22% Ethanol) supplemented with Euxyl PE 9010	PASS
CMR Substances	No CMR (Cat. 1A/1B) substances present	COMPLIANT
Nanomaterials	No nanomaterial ingredients present	COMPLIANT
Hazard Labelling	Highly flammable classification (H225) based on ~21°C flash point	COMPLIANT

Conditions of Safe Use

- For adult use only.
- Do not use on broken or irritated skin.
- Avoid contact with eyes.
- Keep away from heat, open flames, and other ignition sources.
- Keep container tightly closed.
- For external use only. Harmful if taken internally.
- Keep out of reach of children.
- Contains fragrance allergens including Hydroxycitronellal, Geraniol, Pinene, and Rose Ketones.

2. Labelled Warnings and Instructions for Use

Required Warnings

Hazard Statements (GHS / CLP)

- **H225** — Highly flammable liquid and vapour
- **H317** — May cause an allergic skin reaction (due to fragrance allergen content)

Precautionary Statements (as labelled)

- Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
- Keep container tightly closed.
- Keep out of reach of children.
- Spray towards hair and body.
- Avoid contact with eyes.
- For external use only.
- Harmful if taken internally.
- Do not use on broken or irritated skin.

INCI Ingredient List

Ingredients: ALCOHOL, AQUA, PARFUM, PEG-40 HYDROGENATED CASTOR OIL, PHENOXYETHANOL, ETHYLHEXYLGLYCERIN, HEXAMETHYLINDANOPYRAN*, TETRAMETHYL ACETYLOCTAHYDRONAPHTHALENES*, HYDROXYCITRONELLAL*, GERANYL ACETATE*, JUNIPERUS VIRGINIANA OIL*, PINENE*, GERANIOL*, ROSE KETONES*, CITRONELLOL*.

** The presence of these fragrance allergens and constituents must be indicated in the list of ingredients when their concentration exceeds 0.001% in leave-on products, in accordance with Regulation (EC) No 1223/2009.*

Labelling Notes

The product label (Artwork Ref: 1333532) includes the complete INCI ingredient list including the declared allergens and constituents. The label provides the volume declaration (100 ml), required flammability hazard information (~21°C flash point), and required safety warnings in compliance with EU Regulation (EC) No 1223/2009.

3. Reasoning

Basis for Safety Conclusion

The safety assessment of Hair & Body Perfume Mist Wild Strawberry has been conducted in accordance with Regulation (EC) No 1223/2009 (the EU Cosmetics Regulation), specifically Annex I. The assessment is based on all available data relating to the product formula SIL/MFHBM/SW/003-00, physicochemical properties, stability, microbiological quality, packaging, toxicological profiles, and exposure assessment.

Formulation: The product is an aqueous-alcoholic hair and body perfume mist consisting of Ethyl Alcohol (65.00%), Purified Water (27.70%), Fragrance (5.00%), and a validated solubiliser and preservative system. All ingredients are established cosmetic components with well-documented safety profiles. The formulation does not contain any ingredients prohibited under Annex II, nor does it exceed restricted substance limits in Annex III or V. Phenoxyethanol is used at ~0.27%, well within the 1.0% limit of Annex V.

Fragrance safety: The fragrance mixture 'Silky Red Mod' (P01K267) is IFRA 51st Amendment compliant at the 5.00% usage level for Category 2 (Body Mist) and Category 7B (Leave-on hair spray). Identified allergens and constituents, including Hexamethylindanopyran, Hydroxycitronellal, and Geraniol, are managed through IFRA compliance and mandatory labeling per Regulation (EC) No 1223/2009.

Toxicological profile: All ingredients were assessed for systemic exposure (SED) based on a conservative 2 g/day application rate. The resulting Margin of Safety (MoS) exceeds 100 in all cases (lowest MoS = 120 for Ethanol), demonstrating acceptable safety. No CMR or prohibited substances are present.

Stability and microbiological quality: The product demonstrated excellent stability over 6 months under accelerated conditions (40°C ± 2°C / 75% RH ± 5%; Batch 251224; MFG 25/06/2025 → 25/12/2025). All parameters—appearance, colour, odour, alcohol content (65.11–65.38%), specific gravity (0.869–0.874), vacuum leak, and packaging—remained within specification throughout. High ethanol content (65.22%) supplemented by Euxyl PE 9010 (Phenoxyethanol + Ethylhexylglycerin) ensures the product is hostile to microbial growth; challenge testing is not required per ISO 29621.

Flammability: The product is classified as a Flammable Liquid Category 2 (H225) due to the ethanol content and a flash point of ~21°C. Comprehensive hazard labelling and safe handling instructions are applied.
